

AP Calculus BC Summer Assignment

The optional AP Calculus BC summer work is entirely on Khan Academy,
<https://www.khanacademy.org>

1. In order to work on this assignment, you must have a Khan Academy account. If you do not have one already, please sign up using your MRHS google credentials.
2. Once, logged in, join my class using code: **76XKR537**. You can also use the link <https://www.khanacademy.org/join/76XKR537> to go directly to our summer assignment class.
3. I want you to go to the AP Calculus AB section of Khan Academy (use subjects tab in upper left corner to find it). Your goal should be to reach 50% mastery in the course. You can do this at your own pace and in the order you choose. You can see your mastery in the "Progress" section.
4. Hopefully, most of the content is familiar; however, when working on problems, you'll find 2 items you can use for additional help.
 - a. You can use the "Go to Lesson Page" link in the upper right corner to go to the set of videos and/or articles that help explain how to do those problems.
 - b. Or you can use the "Watch a video or use a hint" link to get direct access to videos or solutions for that problem.
